

Yangshao Bio-fertilizer Probiotics

Yangshao bio-fertilizer probiotics are developed by the bioengineering team of Henan Yangshao Bio-Products company, with years of research and experiments, we have acquired the most efficient strains from healthy animals intestinal tract and ecological environment by extracting, screening, domesticating, and cultivating. The products are safe and pollution free to nature, can be widely applied in agriculture production.

Product Features

The strains of the products have specific function, product quality and application effect can be guaranteed.

Most of the products are spore forms, which have good stability, heat stable and extrusion resistance.

The products have fast production performance, strong colonization ability, easy to survive, can react at low pH environment.

The products can react fast and establish high content strains dominant population quickly.

The products are safe and high efficient, non resistance to drugs, non pollution to environment.

Not sensitive to most of the antibiotics, and can match low concentration anti gram-negative bacterium antibiotics.

Product List

Product Name	Specification (CFU/g)	Form
Bacillus subtilis	2*10 ¹⁰ 5*10 ¹⁰ 1*10 ¹¹ 2*10 ¹¹	Powder
Bacillus licheniformis	2*10 ¹⁰ 5*10 ¹⁰ 1*10 ¹¹ 2*10 ¹¹	Powder
Bacillus amyloliquefaciens	2*10 ¹⁰ 5*10 ¹⁰ 1*10 ¹¹ 2*10 ¹¹	Powder
Bacillus laterosporus	2*10 ¹⁰	Powder
Bacillus megaterium	2*10 ¹⁰	Powder
Bacillus methylotrophicus	2*10 ¹⁰ 5*10 ¹⁰ 1*10 ¹¹ 2*10 ¹¹	Powder
Bacillus polymyxa	1*10 ⁸	Powder
Bacillus mucilaginosus	2*10 ¹⁰	Powder
Bacillus thuringiensis	2*10 ¹⁰	Powder
Compound products	-	Powder
